

Language and Communication Technologies Colloquia

The Colloquia in Language and Communication Technologies are jointly organized by the Free University of Bozen-Bolzano (KRDB and CLS Research Centers), EURAC, the University of Trento (Center for Mind/Brain Sciences), the Fondazione Bruno Kessler and the ISTC-CNR.

They started four years ago as an opportunity for students and researchers to get acquainted with the most recent research and to interact with each other.

This year the program features also several colloquia for a larger audience. The latter will be given in Italian and aim to familiarize non-experts with these cutting-edge key technologies that are already showing an important impact on our daily life and are growing rapidly in the international market.

The Colloquia will take place on Thursdays from November 2007 till May 2008 at **5:30 PM** unless otherwise noted. Events are located either in

- **Bolzano**, Piazza Domenicani 3, Faculty of Computer Science,
- **Rovereto**, Corso Bettini 31, CIMeC,
- **Trento**, Via S. Croce 65, Facoltà di Lettere e Filosofia
