Main Aspects

- ▶ Two ways of defining ontologies
 - ▶ Conceptual: a formal specification of a shared conceptualization
 - ▶ Elements of an ontology: concepts, relations, axioms, instances
- ▶ Competency questions in determining scope

Key Material

$$S' \models_{simple} S''$$
 - ▶ Intuitively, subgraph matching with bNodes as existential variables
- ▶ RDFS entailment
 - ▶ Axiomatic triples
 - ▶ RDFS Semantic Conditions (not necessary to know by heart)
