Evaluation Form for Thesis Supervision – BACHELOR

Student: Simone Bottin

Supervisor: Romain Robbes

Co-Supervisor:

Code	Type	Hours	Done
76233	Thesis Project	225	X
76232	Thesis Internship in company	225	☐

Thesis in collaboration with a company (even if NOT internship)	
Name of company:	

Please assign for each criterion a grade and a brief comment of the grade:

Enrollment year	until 2012	from 2013
below average performance	1	0,5
average performance	1,5	1
above average performance	2	1,5
SUM	**4-8 points**	**2-6 points**

	Grade
Context of the project: How well the student has displayed an understanding of the background to the project and related work **Comment: Simone understood the idea of the project very well and was fluent in our discussions on the topic. He also spent a lot of time learning about new technologies such as writing plugins for the VSCode IDE, and the Language Server Protocol.**	1.5
Organisation and presentation of the contents of the Thesis Dissertation: Literacy and professional presentation of the thesis work (a fail grade is possible) **Comment: The thesis is reasonably well-written, but it is sometimes a bit terse. More details would be useful in some sections.**	1
Technical content: How well the student displayed the relevant knowledge and skills at Bachelor level (a fail grade is possible) **Comment: Simone was very technically capable and progressed very well during the thesis. He put in practice what he learned about Software Evolution, VSCode and the Language Server protocol and arrived at a very good and usable result.**	1.5

Originality: The degree of originality shown, commensurate with a 200 hours' project (or 300 hours 509-students) **Comment: I am very satisfied about the originality of the work, particularly thinking of Simone' situation as a working student. Simone was also very autonomous, solving the vast majority of issues on his own without needing my involvement most of the time.**	1.5
General comments: I am very satisfied with Simone's work, which represents a very good starting point for a tool that I am considering using in one of my classes in the longer term.	
Final proposed mark (sum):	**5.5**

The commission confirms or revises the proposed grades. The Thesis is FAILED if there is a FAIL in "Organisation and presentation" or in "Technical Content". The sum of the points is rounded by the commission to the next integer.
